		Site Merchandising	Merchandising Planning	Buying	Inventory	Fulfillment	Supply Chain Optimization	Production Management	Post Production	Localization Engineering	Quality Control
		260	262	264	272	273	274	275	280	283	285
Brief Job Family Descriptions		Develops and executes site merchandising strategies to drive sales and guest conversion on e-commerce platforms. Enhances customer experience and maximizes customer engagement.	Develops and monitors merchandising plans that span several seasons, to optimize sales and inventory efficiency.	Plans and selects a range of products to sell on e-commerce platforms.	Reviews, analyzes and maintains inventory to meet targeted sales and fulfillment levels.	Ensures comprehensive product fulfillment and delivery support and service after close of sale. Coordinates and monitors fulfillment and return service per agreement terms.	Develops and implements, for the e-commerce organizations, innovative solutions to maximize chain efficiency and minimize costs.	Conducts the management and coordination of production activities required for operations of multiple continuously refreshed digital content.	Plans and executes activities required to ready final content for digital distribution on variety of digital platforms. Builds content elements, including video, sound and graphics to create finished content that is ready to distribute.	Converts domestic digital platform content, features, audio and metadata into the languages of, and interactive designs appropriate for, targeted countries. The localization engineering process extracts source files, ensures localization elements are translated, and reintegrates them after the translation is complete.	Identifies and resolves quality problems with created content either prior to or post-distribution.

2024 Digital Content and Technology Survey – Survey Position Grids

Family Level		SOFTWARE ENGINEERING							
		SW Engineering 500	Solutions Engineering 501	Artificial Intelligence / Machine Learning 502	Web Development (F-E=Front-End) 510	Mobile App Development 515	SW Architecture 530	Video SW Engineering 531	Rendering Engineering 532
		Designs, develops and deploys software engineering solutions that provide desired functionality to digital platforms, products and services.	Improves application lifecycles, evolves software systems to increase their reliability, monitors application performance and ensures overall system health. Develops processes, tools, metrics and documentation that improve product quality and reduce the cost of support.	Structures and deploys artificial intelligence systems and applies machine learning methods in the design and development of models, algorithms and tools to improve the usefulness of big data. Works closely with data scientists, application developers and product managers in the development of new software architectures that use data to improve products.	Designs, develops and implements front-end functionality for online websites, products and programs.	Develops apps for embedded mobile operating systems, such as iOS and Android.	Ensures software solutions are built within a consistent framework across the organization and within systems.	Designs, develops and deploys software engineering solutions that provide desired functionality to digital video products and services (e.g., video compression, processing, encoding, streaming and playback).	Designs, writes, debugs and refines rendering systems, features, tools and infrastructure that allow artists to create the final appearance of computer graphics.
